- Expert at C++, Java, HTML/CSS, and JavaScript
- Skilled at Python, C#, and C

Resource Familiarity (80%)

- Vue, React, SFML, and GLFW
- Express, Spring Boot, API experience (Stripe, UPS)

Education

bTech degree (Undergrad)
Bachelor of Technology
Games Development Option

British Columbia

Institute of Technology

September 2020 - Present
Burnaby, BC

CST diploma

Computer Systems Technology
Business Ideation Option

British Columbia

Institute of Technology

September 2018 - April 2020
Vancouver, BC

- Grouped in teams to submit competitive projects under strict deadlines.
- Learned fundamental and advanced algorithms.
- Learned design patterns and polished my practice of OOP.
- Designed user interfaces.

Career Objective

To make refined office software apps that help users attain a refined understanding of their operating system and its vices. With a minimal amount of experience testing my interfaces, it is my desire that the people who use my software spend less effort and be more comfortable than they would with any alternative.

Since I discovered my passion for the software industry over ten years ago, I was able to embrace my own style in coding and reiterate feedback to what I deem valuable to any software portfolio: office apps, websites, interface wireframes, and games. Starting my own business in 2020 helped me learn where I want to go through hard work, dedication, persistence, and sacrifice. I continually challenge myself and adapt to new environments in technology as you can see under my work experience.

Work Experience

Software Developer / Engineer

Intiva Technologies December 2020 - Now Abbotsford, BC
(<https://intivatechnologies.ca>)

- Marketed and developed products to over ten companies including websites, cards, logos, and signs.
- Supercharged development process of websites and web apps by engineering software to produce complex code repositories.
- Routed full-stack web apps to be loaded with NGINX.
- Learned how to integrate with complex libraries and API's.

Electronics / Arcade Technician

Cineplex December 2023 - May 2023 Abbotsford, BC

- Applied my understanding of software and control systems to troubleshoot problems with arcade mechanisms.
- Gained valuable insights on the industry and its market.
- Had to be able to perform well in a high-pressure environment and think on the spot.

Sales Advisor

Best Buy June - August 2022 Chilliwack, BC

- Learned to appreciate sales models I didn't enjoy at first.
- Learned how to communicate options gracefully and effectively.
- Communicated with management to make offers to the client and sold company memberships.
- Engaged in a daily task list to ensure each department was stocked and clean.
